

Don't Let **Foot Drop
Limit Your Freedom**

Tiwan Technology Developement Co.

Tiwan T-102

Walk more **NATURALLY** with Advanced Technology

Foot Drop is a condition where the muscles in the foot are too weak to properly lift the foot and toes while walking. T-102 Foot Drop System helps to alleviate walking challenges that may result from:

- ✓ Multiple sclerosis
- ✓ Stroke
- ✓ Traumatic brain injury
- ✓ Incomplete spinal cord injury

The T-102 System is an advanced functional electrical stimulation (FES) system that stimulates the nerves in your lower leg, activating muscles to lift the foot which allows you to walk more naturally.

Tiwan Android Application helps you access advanced features of T-102 and evaluate your progress using your smartphone.

T-102 helps you Walk Back into **Life**

Some proven advantages of T-102 Foot Drop System are:

- + Provides a more natural movement when walking
- + Increase speed, stability and confidence
- + Reduce falls
- + Reeducate muscles using Bio Feedback mode
- + Prevent muscle loss (often called atrophy)
- + Maintain or increase range of motion in the ankle and foot
- + Increase blood flow
- + Help Patients regain mobility and independence
- + Help Patients raising stairs

Tiwan Technology Development Co.

The Best Scientifically Proven Method to fight Foot Drop

	AFO	T-102
• Prevent muscle loss (often called atrophy)	✗	✓
• Maintain or increase range of motion in the ankle and foot	✗	✓
• Increase blood flow	✗	✓
• Improve Gait	✗	✓
• Easy to use	✗	✓

Using FES Foot Drop Systems is the only proven method to fight foot drop and improve gait. Tiwan T-102 Foot Drop System is one of the best FES Foot Drop devices in the world. Using an android app and advanced technology, T-102 monitors the patient movements and continuously adjusts the FES signals to achieve the best results.

T-102 is very small and light and can be easily worn under most cloths.

Only by 25 minutes of charging, T-102 can be used for up to 4 days.

Training and Massage modes

Integrated training and massage modes help patients to work on muscles and prevent shortening of Achilles tendon. Advanced EMS Mode increases blood flow and warms up foot muscles.
